A woman with dark hair, wearing safety glasses and a maroon lab coat, stands with her arms crossed, smiling. In the background, there are several orange liquid handling reservoirs and various laboratory tubes and containers on a table.

Samco Scientific Liquid Handling Solutions

Our products have been delivering quality, safety and craftsmanship to the clinical, research and industrial markets since 1971.

Our comprehensive range of products include auto analyzer cups, 24-hour urine containers, plastic test tubes and specimen containers.

Samco Bio-Tite Specimen Containers

The Choice for Confidence

Bio-Tite™ Specimen Containers feature an all plastic cap and vial transport system specifically designed for the collection and transport of fluids, solids and powders. The containers are ideal for the collection of urine, formalin or fixative fills and histology transport.

The stackable, shatter-resistant containers are manufactured from virgin polypropylene and have a proprietary, all plastic, leak-resistant seal that prevents bio-hazardous spills. Bio-Tite® containers are tested at varying pressures, making them ideal for use in various transport systems.

The manufacturing technology that centers primarily on bi-component molding and advanced plastic tooling design allows the product to be manufactured with several inherent value-added features. The end result is a superior product that addresses the broad requirements of the general market as well as the specific requirements of the end user.

and Value

Leak-resistant for utmost reliability

- Bio-Tite caps create a leak-resistant seal for utmost confidence
- Dual threaded caps create improved sealing
- Gamma irradiation sterilization means no potential for residue that can cause false test results
- Deep plug seal helps prevent leaking

Designed for superior safety and handling

- Top and bottom positive grip knurls are easy to grip and open using latex gloves, for ease of handling and safety
- Containers can be stacked atop one another, making them easier to store and saving lab space
- Straight sided to help minimize tipping

Variety of Sizes and Styles

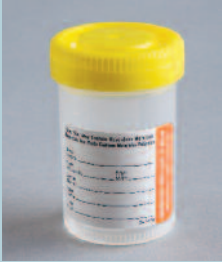

- Virgin polypropylene containers allow higher clarity to see samples, and will not become brittle
- 48mm opening is the right choice for tight storage situations
- Wider 53mm opening is especially suited for urine collection for women during pregnancy and older or overweight patients
- Available in sterile and non-sterile, labeled or non-labeled, bulk or individually packed
- Sterile indicator tab assures tamper evidence
- Bilingual English and Spanish label facilitates accurate usage

The Samco Scientific brand offers a variety of containers designed with different sizes and cap colors.

Bio-Tite Specimen Containers for the Operating Room

- Dual threaded caps for leak resistant seal
- Sterile, individually wrapped, peel pouch allows for easy opening onto a sterile field
- Available in sterile, economical baggy wrap
- Ideal for biopsy collection and transport in the operating room

Stock Code	Container Size/ Cap Size	Description	Cap Color	Sterility	Qty/ Pack	Bags/ Case	Case Qty
Sterile							
07 0005	120mL/53mm	Containers with white cap, individually wrapped in poly bags	●	S	100	1	100
07 0006	120mL/53mm	Containers with blue cap sealed in split and drop pouch	●	S	100	1	100

Bio-Tite Midstream Specimen Containers

- 100% high clarity virgin polypropylene
- Easy grip top and bottom for ease of handling
- Two convenient styles, with or without funnel
- Instructions and castile soap wipes in every kit
- Kit with funnel is ideal for women, obese patients and geriatric patients

Stock Code	Container Size/ Cap Size	Description	Sterility	Qty/ Pack	Bags/ Case	Case Qty
Sterile						
07 0010	90mL/53mm	Midstream collection kit (funnel, 3 castile soap wipes, packaged in tear-open Ziploc® bag)	S	50	1	50

Pathology and General Use Specimen Containers

Both 180mL and 250mL containers are made of virgin polypropylene which resists cracking, splitting and are highly resistant to most chemicals including formaldehyde.

- Economical and disposable for single use handling of dry or liquid specimens
- Molded graduations for fill line verification
- Translucent containers allowing for viewing container contents
- Non-sterile and used for storage and transport of fluids and some pathology specimens, powders and solids.
- Secure fitting 70mm white ribbed cap with F-217 liner is a general purpose cap design for broad applications.

Stock Code	Container Size/ Cap Size	Description	Sterility	Qty/ Pack	Bags/ Case	Case Qty

4A 70400	70mm	Caps, ribbed white caps with F-217 liner, bulk	NS	800	1	800

24-hour Urine Collection

We offer a 24-hour Urine Collection line geared at alleviating mess and exposure when handling urine collection and sampling. Our containers are amber tinted to protect from light exposure and are inert to normal preservative.

- 2500mL, 3000mL and 3500mL
- 100% polyethylene and amber colored for light filtration
- Large carrying handles for easy transportation
- Easy to read graduations and highly accurate scales
- Custom cap and mouth design helps prevent leakage
- 2500mL and 3500mL containers feature a custom spout and vent
- Upright configuration for compact storage

UrineGUARD

- Distinct neck design and special air vent reduces the chance of aerosoling and splashing common when handling large urine samples
- Custom spout allows for accurate pouring into test tubes, centrifuge tubes or aliquot bottles
- Accurate scale allows for proper measurement, ceasing the need to transfer samples into a graduated cylinder

Stock Code	Description	Qty/ Pack	Bags/ Case	Case Qty
30 2500	2500mL 24-hour UrineGUARD™ specimen containers	40	1	40
30 3500	3500mL 24-hour UrineGUARD specimen containers	24	1	24

SW-3000

- Large handle for easy transportation
- Custom cap and neck design help prevent leaking
- Accurate scale allows for proper measurement, ceasing the need to transfer samples into a graduated cylinder
- Amber tinted to protect samples from the damage of light exposure

Stock Code	Description	Qty/ Pack	Bags/ Case	Case Qty
30 3000	3000mL 24-hour UrineGUARD specimen containers	40	1	40
30 3000L	3500mL 24-hour UrineGUARD specimen containers with bilingual instruction sticker	40	1	40

30 0012	24-hour patient instruction labels, 250/roll	250	6	1,500
30 0013	Patient and test information label	250	6	1,500

Analyzer and Sample Cups

Samco Scientific sample cups are the perfect choice for autosamplers, serum dilutions, microsampling and other laboratory applications. The conical wells are designed for complete sample pick up. Caps are available to minimize evaporation. Free standing base prevents tipping and spilling.

- High clarity polystyrene
- Precision molded with graduations and conical bottoms for efficient aspiration
- Resistant to most aqueous solutions
- Conical bottom aids in sampling

Test Tubes, Disposable Culture Tubes (DCTs)

Samco Scientific multi-use tubes are designed for most laboratory applications. The plastic tubes are chemical free and biologically inert. Each tube is precision molded and manufactured from premium grade materials. Our processes are monitored with quality checks which provide continued lot-to-lot uniformity and reliable performance. All sterile tubes are gamma-irradiated and ready to use. We offer a choice of clarified polypropylene for strength and resistance, or polystyrene for superior clarity.

- **Convenient packaging**
 - >> Sterile – bulk or individually wrapped
 - >> Non-sterile – bulk or packs
- **Most sizes available with two-position snap cap, screw cap or without caps**
- **Polypropylene and polystyrene material**
